Sarajevo, 04. Jun 2021.

INVITATION

It is a great honor to invite you to participate in the Business-Academia Partnership Workshop, an event organized within the Erasmus+ Ka2 CBHE “Business driven problem-based learning for academic excellence in geoinformatics - GEOBIZ” project (No. 610225-EPP-1-2019-1-HR-EPPKA2-CBHE-JP), which will take place on June 11th, 2021. The workshop will be held on June 11th, 2021, in hybrid form, at the Faculty of Civil Engineering, University of Sarajevo, Street Patriotske Lige 30, starting at 10:00. The number of participants who can physically participate is limited to 10, so most participants will follow the workshop [online](#) using the ZOOM app. Participation in the workshop is free, but due to the Covid-19 epidemic, registration is required - online via ZOOM ([here](#)).

Today we are faced with the fact that technological development is extremely fast. The business sector has difficulty in keeping pace with this development, while academic institutions face even greater challenges in modernizing curricula. The answer to these challenges is the cooperation of the business, public and academic community in the design and implementation of technologically advanced subjects, especially in their practical part.

Therefore, the goal of the GEOBIZ project and this workshop is to encourage the establishment of new forms of cooperation in the field of geoinformatics (business, public and academic sector) in order to technologically advanced geoinformatics content. Earth observation from air and space, laser scanning, satellite positioning, GIS applications, etc. could be modernized on the basis of problem - based learning (PBL) and examples from practice in an interactive environment and joint teaching of subjects.

We will be honored with your participation because we believe that you can contribute to solving the challenges and establishing mutually beneficial cooperation.

Cordially,

Prof. dr. Medžida Mulić
